PROFILE

B.Sc. Digital Forensics with hands-on experience in VAPT, penetration testing and digital forensics investigations. Skilled in evidence acquisition, web/API security testing, network security, firewall configuration, IDS/IPS, and security automation using Python and Bash.

EDUCATION

- Bachelor of Science in Digital Forensics, 2023-2026, from Indian School of Ethical Hacking (ISOEH) under Maulana Abul Kalam Azad University of Technology, West Bengal, India, (MAKAUT).

WORK EXPERIENCE

VAPT Internship — ISOAH Data Securities Pvt. Ltd. Kolkata, India (March 2026 - June 2026)

- Executed black/grey box VAPT on web apps, APIs, and network via Burp Suite and Nmap, identifying critical OWASP Top 10 flaws.
 - Audited Microsoft 365 and admin centre infrastructures to uncover privilege exposures, access gaps, and critical misconfigurations.
 - Triaged Nessus/OpenVAS scans, created functional PoCs, and delivered technical remediation reports with CVSS risk scoring.
-

TECHNICAL SKILLS

- Forensics Tools:** Magnet Axiom, Autopsy, FTK Imager, Cellebrite, Oxygen Forensics.
- Cybersecurity Tools:** Nmap, Burpsuite, OpenVAS, Wireshark, Nessus, Nikto, Metasploit, ZAP.
- Programming & Scripting:** Python, Shell Scripting, Bash.
- Security Areas:** VAPT, WAPT, Network Security, Cryptography, API Security, Firewall, IDS/IPS, OSINT.
- Operating Systems:** Kali Linux, Black Arch, Parrot OS, Ubuntu, CentOS, Windows.

CERTIFICATIONS & TRAINING

- (CEH) v13 AI Certified. ([link](#)), CHFI v11 Certified. ([link](#))
 - Core Python Programming Course([link](#)),Cyraksha, Infocom Hackstar, Cryptoquest, MAKAUT CTF. ([link](#))
 - Cyber Job Simulation: Deloitte Australia ([link](#)), Mastercard & New York Jobs CEO Council ([link](#))
 - CPPS ([link](#)), CRTOM ([link](#)), CCEP ([link](#)), CTIGA ([link](#))
-

PROJECTS

- Forensic Analyzer –** (Nov 2025-Present)
 - Develop a Web-based Digital Forensic Learning Tool.
 - Implemented Basic Hashing and encoding Features.
- Cyber Security Multi Tool Launcher –** (Aug 2025- present)
 - Python-based GUI Integrating Nmap, Nikto, OWASP ZAP, and forensics tools.
 - One-Click interface to manage Multiple Tool.
 - Streamlines Cybersecurity tasks for Efficiency and Ease.
- AI – Powered Phishing Email Detector –** (June 2025- present)
 - Detect Phishing Emails using AI based analysis.
 - Analyses Header and content for Malicious Patterns.
 - Enhances Email Security awareness and Threat Prevention.

KEY STRENGTHS

- Analytical and detail-oriented approach to security assessments and audits.
- Strong problem-solving and critical-thinking abilities in identifying security risks and gaps.
- Quick Learner with adaptability to emerging technologies and evolving cybersecurity challenges.
